

NETmundial – a meeting on the
future of Internet governance
*Progress on multi-stakeholder
contributions to the meeting and our
next steps*

Brazilian President Rousseff

United Nations General Assembly, New York, 24 September 2013

We need to create multilateral [*multi-stakeholder*] mechanisms for the worldwide network that are capable of ensuring principles such as:

1. Freedom of expression, privacy of the individual and respect for human rights.
 2. Open, multilateral and democratic governance, carried out with transparency by stimulating collective creativity and the participation of society, governments and the private sector.
 3. Universality that ensures the social and human development and the construction of inclusive and non-discriminatory societies.
 4. Cultural diversity, without the imposition of beliefs, customs and values.
 5. Neutrality of the network, guided only by technical and ethical criteria, rendering it inadmissible to restrict it for political, commercial, religious or any other purposes.
- Harnessing the full potential of the Internet requires, therefore, responsible regulation, which ensures at the same time freedom of expression, security and respect for human rights.

Global Multistakeholder
Meeting on the Future
of Internet Governance

NETmundial

23, 24 - April 2014

Grand Hyatt Hotel
São Paulo, **Brazil**
